

DynPro Profile

DynPro is a dynamic, fast-growing information systems consulting firm specializing in the following areas: Headquartered on the edge of North Carolina's acclaimed Research Triangle Park, DynPro provides smart, innovative solutions to high-tech and manufacturing companies. DynPro also has offices in Europe and Asia. As a dynamic firm, DynPro is agile and flexible enough to meet customer needs. We recruit high quality, expert consultants; but it's our ability to manage and support these consultants that really sets us apart. Our innovative internal training center helps consultants continually expand and improve their skill sets, while providing them knowledge transfer via direct access to each other and their principal consultants for added back-up and support. Started in 1996, DynPro has helped outstanding clients to find world-class solutions. With our partners we have cultivated relationships around the world - finding the best people, the best systems, and the most innovative responses to today's challenging business questions. Our expertise is in leveraging your existing strengths and finding effective solutions to fill in the holes.

Though our staffing consists primarily of PeopleSoft, SAP and Siebel consultants, DynPro is also actively engaged in legacy and client server development and support. Our e-commerce focus is developing and deploying business to business applications, business to consumer applications as well as integrating web technology to back end legacy and ERP systems.
